Eye Morphology RBRCLA_EYE_001

Purpose

To detect abnormalities in eye morphology.

Experimental Design

- **Minimum number of animals :** 4M + 4F
- **Age at test:** Week 53
- **Sex:** We do not expect the results of this test to show sexual dimorphism

Procedure

1. Examine the anterior of both eyes (e.g. with slit lamp) and record any abnormalities
2. Test the iris/pupil light response
3. Image abnormal eyes as a minimum or all eyes if capacity permits
4. Dilate both eyes
5. Examine the anterior and posterior of both dilated eyes (e.g. with slit lamp and ophthalmoscope) and record any abnormalities
6. Image abnormal eyes as a minimum or all eyes if capacity permits

OCT:

1. Turn on the OCT and start the database
2. Anaesthetize mouse
3. Prepare mouse eyes with drops and place contact lens (focal length 10 mm) on the right eye
4. Enter mouse data in the “Create new patient file” area and switch to the “Acquisition” window
5. Move the OCT camera to the right position and activate measurement modus
6. Place mouse collaterally to the OCT camera on the right side of a platform that is fixed in front of the OCT lens
7. Search the contact lens in the live picture of the fundus image field and place the pupil of the mouse eye in the centre of the window
8. Move the OCT camera such that OCT lens and contact lens touch each other
9. Focus the fundus picture by slightly moving up/down or forward/backward
10. Save fundus images
11. Set the "Ref.Arm“ ruler such that the section of the retina is placed in the centre of the blue rectangle
12. Set the mode of measurement on "vertical, horizontal line“
13. Move the blue horizontal line in the fundus image field to the optic nerve level
14. Save images of retinal sections
15. Move the OCT camera to the left position

16. Repeat measurement procedure for the left eye

Scheimpflug Imaging:

1. Turn on the Pentacam and start the patient data management
2. Apply one drop 0.5% Atropine to each mouse eye for pupil dilation
3. Enter mouse data in the “Patient” group box and switch to the Scan menu
4. Activate the “1 Picture” modus in the “Image Options” area
5. Move Pentacam to the right position
6. Hold the mouse on a platform such that the vertical LED 475 nm light slit is orientated in the center of the right eye ball
7. Guarantee optimal focus by using the fine adjustment software tool in the adjustment window
8. Start imaging manually by pressing the “Start Scan” button
9. Scheimpflug images are saved automatically
10. Move Pentacam to the left position
11. Repeat measurement procedure for the left eye

Notes

- Only the eye that was not used for retro-orbital bleeds at early adult should be examined.

- As a minimum, all abnormalities should be imaged.
    - Where capacity permits, all mice can be imaged

- Majority of parameters can be analysed using the standard approach for assessing categorical data. To increase power for analysis purposes, where an abnormality is detected in the left, right or both eyes, the data may be combined to generate one "abnormal" category.

- Data for both eyes is recorded under one parameter to distinguish phenotypes of incomplete penetrance in individuals and if an observation for one or both eyes cannot be made, this is recorded as ‘no data’. The IMPC analysis pipeline does not take into account whether an abnormality is fully penetrant or not and the same weight is given for an abnormal observations in one or both eyes. In cases where it is not possible to confirm if an abnormality is present or not, the data is not included in the statistical analysis. The following logic is applied in determining whether to include the data in analysis:
    - If at least one of the eyes shows an abnormality in a particular parameter, the data for that specimen will be included in the statistical analysis even if the other eye is marked as "no data".
    - If the eyes are marked as "no data", or one eye is normal and the other eye is "no data" for a particular parameter the data for that specimen will not be included in the statistical analysis.

Data QC

Image QC is typically performed during data collection to ensure high quality images are captured whilst eyes are dilated etc.

Parameters and Metadata

Eye RBRCLA_EYE_001_001 | v1.0

simpleParameter

Req. Analysis: false **Req. Upload:** false **Is Annotated:** true

Description: eye

Options: present, absent left eye, absent right eye, absent both eyes,

---

Bulging eye RBRCLA_EYE_002_001 | v1.0

simpleParameter

Req. Analysis: false **Req. Upload:** false **Is Annotated:** true

Description: bulging_eye

Options: absent, present left eye, present right eye, present both eyes, no data left eye, no data right eye, no data for both eyes, no data left eye, present right eye, no data right eye, present left eye,

---

Eye Hemorrhage or Blood Presence RBRCLA_EYE_003_001 | v1.0

simpleParameter

Req. Analysis: false **Req. Upload:** false **Is Annotated:** true

Description: eye_hemorrhage_or_blood_presence

Options: absent, present left eye, present right eye, present both eyes, no data left eye, no data right eye, no data for both eyes, no data left eye, present right eye, no data right eye, present left eye,

---

Eyelid morphology RBRCLA_EYE_004_001 | v1.0

simpleParameter

Req. Analysis: false **Req. Upload:** false **Is Annotated:** true

Description: eyelid_morphology

Options: normal, left eye abnormal, right eye abnormal, both eyes abnormal, no data left eye, no data right eye, no data for both eyes, no data left eye, right eye abnormal, no data right eye, left eye abnormal,

---

Eyelid closure RBRCLA_EYE_005_001 | v1.0

simpleParameter

Req. Analysis: false **Req. Upload:** false **Is Annotated:** true

Description: eyelid_closure

Options: normal, left eye closed, right eye closed, both eyes closed, no data left eye, no data right eye, no data for both eyes, no data left eye, right eye closed, no data right eye, left eye closed,

Narrow eye opening RBRCLA_EYE_006_001 | v1.0

simpleParameter

Req. Analysis: false **Req. Upload:** false **Is Annotated:** true

Description: narrow_eye_opening

Options: normal, left eye abnormal, right eye abnormal, both eyes abnormal, no data left eye, no data right eye, no data for both eyes, no data left eye, right eye abnormal, no data right eye, left eye abnormal,

---

Cornea RBRCLA_EYE_007_001 | v1.0

simpleParameter

Req. Analysis: false **Req. Upload:** true **Is Annotated:** true

Description: cornea

Options: normal, left eye abnormal, right eye abnormal, both eyes abnormal, no data left eye, no data right eye, no data for both eyes, no data left eye, right eye abnormal, no data right eye, left eye abnormal,

---

Corneal opacity RBRCLA_EYE_008_001 | v1.0

simpleParameter

Req. Analysis: false **Req. Upload:** true **Is Annotated:** true

Description: corneal_opacity

Options: absent, present left eye, present right eye, present both eyes, no data left eye, no data right eye, no data for both eyes, no data left eye, present right eye, no data right eye, present left eye,

---

Corneal vascularization RBRCLA_EYE_009_001 | v1.0

simpleParameter

Req. Analysis: false **Req. Upload:** false **Is Annotated:** true

Description: corneal_vascularization

Options: absent, present left eye, present right eye, present both eyes, no data left eye, no data right eye, no data for both eyes, no data left eye, present right eye, no data right eye, present left eye,

---

Iris/Pupil RBRCLA_EYE_010_001 | v1.0

simpleParameter

Req. Analysis: false **Req. Upload:** false **Is Annotated:** true

Description: iris_pupil

Options: normal, left eye abnormal, right eye abnormal, both eyes abnormal, no data left eye, no data right eye, no data for both eyes, no data left eye, right eye abnormal, no data right eye, left eye abnormal,

---

Pupil Position RBRCLA_EYE_011_001 | v1.0

simpleParameter

Req. Analysis: false **Req. Upload:** false **Is Annotated:** true

Description: pupil_position

Options: normal, left eye abnormal, right eye abnormal, both eyes abnormal,
no data left eye, no data right eye, no data for both eyes, no data left eye, right eye abnormal,
no data right eye, left eye abnormal,

Pupil Shape RBRCLA_EYE_012_001 | v1.0

simpleParameter

Req. Analysis: false **Req. Upload:** false **Is Annotated:** true

Description: pupil_shape

Options: normal, left eye abnormal, right eye abnormal, both eyes abnormal,
no data left eye, no data right eye, no data for both eyes, no data left eye, right eye abnormal,
no data right eye, left eye abnormal,

Pupil Dilation RBRCLA_EYE_013_001 | v1.0

simpleParameter

Req. Analysis: false **Req. Upload:** false **Is Annotated:** true

Description: pupil_dilation

Options: normal, left eye dilated, right eye dilated, both eyes dilated, no data left eye, no data right eye, no data for both eyes, no data left eye, right eye dilated, no data right eye, left eye dilated,

---

Pupil Light Response RBRCLA_EYE_014_001 | v1.0

simpleParameter

Req. Analysis: false **Req. Upload:** false **Is Annotated:** true

Description: pupil_light_response

Options: normal, left eye abnormal, right eye abnormal, both eyes abnormal, no data left eye, no data right eye, no data for both eyes, no data left eye, right eye abnormal, no data right eye, left eye abnormal,

---

Iris Pigmentation RBRCLA_EYE_015_001 | v1.0

simpleParameter

Req. Analysis: false **Req. Upload:** false **Is Annotated:** true

Description: iris_pigmentation

Options: normal, left eye abnormal, right eye abnormal, both eyes abnormal, no data left eye, no data right eye, no data for both eyes, no data left eye, right eye abnormal, no data right eye, left eye abnormal,

---

Lens RBRCLA_EYE_016_001 | v1.0

simpleParameter

Req. Analysis: false **Req. Upload:** true **Is Annotated:** true

Description: lens

Options: normal, left eye abnormal, right eye abnormal, both eyes abnormal,
no data left eye, no data right eye, no data for both eyes, no data left eye, right eye abnormal,
no data right eye, left eye abnormal,

Lens Opacity RBRCLA_EYE_017_001 | v1.0

simpleParameter

Req. Analysis: false **Req. Upload:** true **Is Annotated:** true
