Body Weight IMPC_BWT_001

Purpose

The body weight test measures the weight of the mouse in a time series, allowing monitoring of its evolution; also, it is required in many other procedures.

Equipment

- Laboratory Balance

Procedure

- Place a cage containing mice on an operation table
- Remove a mouse from its cage. Determine and record its weight.
- Return the mouse to the cage or continue with a procedure.

Notes

The body weight of each mouse is to be measured weekly, from the 4th until the 16th week. Optional additional weighs may also be recorded.

Body weight curve IMPC_BWT_008_001 | v1.1

Unit Measured: g

Description:
Derivation to collect all body weights measured (when available) and plot them correctly as time series.

Derivation: unimplemented('')

Increments: Minimum 1
